

We are a successful and growing systems provider within the European space technology group OHB Technology AG, where over 1,500 highly qualified employees based in Germany, Europe and the United States develop and produce space technologies.

For our electronics systems division for the programme navigation, we are currently seeking for immediate commencement a

**Satellite Avionics System Engineer (m/f)
(Code Number 11512)**

Your specific duties will be to:

- design, analyze and configure avionic systems for satellite applications
- produce and maintain documentation such as specifications, design descriptions, test procedures and reports
- develop and implement corresponding test specifications
- oversee, supervise and manage subcontractors and suppliers
- support satellite projects from the proposal phase through to the in-orbit commission
- develop new business and draft corresponding proposals

Your background:

You have a degree in engineering with a major in electrical engineering or comparable qualifications. Ideally, you have extensive experience in satellite on-board data handling. You should be familiar with Phase B/C/D hardware objects, ideally in the area of avionic systems (on-board computers and related subsystems) for satellites. Similarly, we expect you to be confident in negotiations with customers and willing to travel. As well as this, you are flexible and able to work swiftly your way into new duties. We also assume that you have good skills in written and spoken English.

We offer you an interesting and varied position in a modern high-tech company. Have we aroused your interest? If so, we would be pleased to receive your detailed application stating your salary expectations by e-mail.
