

We are a successful and growing systems provider within the European space technology group OHB Technology AG, where over 1,500 highly qualified employees based in Germany, Europe and the United States develop and produce space technologies.

We are currently seeking for our national and international satellite programmes for immediate commencement a

**Design Engineer (m/f)
(Code number 161612)**

Your specific duties will be to:

- develop different satellite configurations and the corresponding subsystem accommodation
- prepare the relevant configuration and accommodation drawings
- develop and design satellite structures
- develop and design mechanical ground devices for satellite handling
- prepare the related fabrication documents and instructions
- prepare documentation such as design and interface descriptions
- oversee, supervise and manage subcontractors and suppliers
- execute and oversee assembly, integration and testing work on the satellite
- assemble, start up and test the ground equipment
- consult with the customer and subcontractors on the applicable requirements
- present the results of your work to the customer

Your background:

You have a degree in engineering with a major in mechanical engineering or comparable qualifications as well as several years of professional experience as a design engineer ideally in the area of satellite technology. You are proficient in the use of a 3D CAD system, ideally Unigraphics NX. You are confident in negotiations with customers and are willing to travel. As well as this, you are flexible and able to swiftly work your way into new duties. We also assume that you have good skills in written and spoken English.

If you can work independently and efficiently and enjoy working on a major project in a team, we would be pleased to receive your detailed application stating your salary expectations and the code number above by e-mail.
