

We are a successful and growing systems provider within the European space technology group OHB Technology AG, where over 1,500 highly qualified employees based in Germany, Europe and the United States develop and produce space technologies.

We are currently seeking for our program “SGEO” for immediate commencement a

**Embedded Software Developer (m/f)
(Code number 221801)**

Your specific duties will be to:

- develop the detailed software design at the subsystem level
- implement the software
- perform corresponding module and integration tests
- support the software system tests
- participate in the authoring of the software documentation

Your background:

You have a degree in engineering with a major in computer technology, electrical engineering or comparable qualifications. Ideally, you have professional experience as a developer of embedded software, preferably in the aviation and space technology area. We expect you to have thorough knowledge of UML, C/C++ as well as experience in real-time operating systems (e.g. RTEMS, VxWorks). Experience with the IBM Rational Rhapsody development tool would also be of advantage. You are communicative and enjoy working on large projects in a team. Your strengths include flexibility, responsibility, a performance-oriented and systematic approach to your work - even under heavy time pressure - as well as the ability to swiftly work your way into new duties. You are fluent in written and spoken German and English for this international task.

We offer you an interesting and varied position in a modern high-tech company. Have we aroused your interest? If so, we would be pleased to receive your detailed application stating your salary expectations and the code number above by e-mail.
