

We are a successful and growing systems specialist within the European space technology group OHB Technology AG, where over 1,500 highly qualified specialists develop and produce space technologies in Germany, the rest of Europe and the United States.

We are currently seeking for our national and international satellite programmes for immediate commencement several

**Project Managers (m/f)  
(Code number 310402)**

**Your specific duties will be:**

You act as manager of a project for satellite system development and integration. In this role you will be responsibility for quality as well as schedule and budget compliance for a sophisticated project. You will implement the project objectives as defined in customer requirements and allocate the resources required to achieve this act as the direct contact for our national and international customers (DLR, ESA, commercial satellite operators) and report to the company's management.

**Your background:**

You have a degree in engineering with a major in engineering, physics or comparable qualifications. You also have several years of professional experience in the space industry. Ideally, you have previously worked on DLR or ESA satellite system development projects. You are accustomed to working in teams and making decisions and have a solid technical background. You are a skilled and confident negotiator and possess well-developed communication skills. You attach crucial importance to customer orientation. You have excellent conceptual and analytical skills as well as a good knowledge of process management/analysis. You are fluent in written and spoken English and, ideally, also in a European language.

We offer you an interesting and varied position in a modern high-tech company. Have we aroused your interest? If so, we would be pleased to receive your detailed application stating your salary expectations and quoting the above code number by e-mail.
