

We are a successful and growing systems provider within the European space technology group OHB Technology AG, where over 1,500 highly qualified employees based in Germany, Europe and the US develop and produce space technologies.

For the “Space-Flight-Systems Studies” division we are seeking with immediate effect an

**Engineer Transport System Studies (m/f)
(Code number 401103)**

Scope of duties:

- Assisting with devising technical proposals focussing on space transport systems.
- Assisting with system studies on space transport systems, requirements analysis, new beam concepts and re-entry systems
- Pre-design of new transport systems, analysis of partial aspects, system as well as its subsystem specification

Your qualifications:

You have a degree in Aerospace Technologies and professional experience in the aerospace industry. You ideally have profound knowledge of space flight system technologies. You also have detailed knowledge of beam systems, re-entry systems, web analysis, propulsion concepts, overall-system design, system engineering or of Project Management. You enjoy working in a team, you work well under pressure, you are creative and reliable and have a sense of responsibility. Additionally, you have excellent English language skills.

We offer you an interesting and varied position in a modern high-tech company. Are you interested? If so, we look forward to receiving your detailed application stating your salary expectations and quoting the above code number by e-mail.
