

We are a successful and growing systems provider within the European space technology group OHB Technology AG, where over 1,500 highly qualified employees based in Germany, Europe and the United States develop and produce space technologies.

For our software division for the programme navigation, we are currently seeking for immediate commencement a

**Senior Embedded Software Developer (m/f)
(Code Number 41512)**

Your specific duties will be to:

- participate in system analysis and software architecture
- develop the detailed software design at the subsystem level
- implement the software
- perform corresponding module and integration tests
- support the software system tests
- participate in the authoring of the software documentation

Your background:

You have a degree in engineering with a major in electrical engineering, computer technology, space technology or comparable qualifications. As well as this, you have several years of professional experience as a developer of embedded software, ideally in aerospace. Good knowledge of object-oriented analysis and design would also be welcome. We expect you to have thorough knowledge of C/C++ as well as experience in the use of real-time operating systems (e.g. RTEMS, VxWorks, NUCLEUS). Knowledge of the MIL-1553 bus system as well as DOORS, UML, IBM Rational Rhapsody, INNOVATOR, Tcl/Tk would also be of advantage. You are fluent in written and spoken English.

We offer you an interesting and varied position in a modern high-tech company. Have we aroused your interest? If so, we would be pleased to receive your detailed application stating your salary expectations and the code number above by e-mail.
