

We are a successful and growing systems specialist within the European space technology group OHB Technology AG, where over 1,500 highly qualified specialists develop and produce space technologies in Germany, the rest of Europe and the United States.

For our national and international geostationary satellite programmes, we are currently seeking for immediate commencement a

**Project Manager Geostationary Satellite Programme (m/f)  
(Code Number 442303)**

**Your specific duties will be:**

- Project management responsibility for development and integration of a geostationary satellite
- Overall responsibility for the project implementation, focusing on ensuring technical quality as well as schedule and budget compliance
- Implement the project objectives as defined in customer requirements and allocate the resources needed for a successful project implementation
- Acting as direct interface to the national and international customers (DLR, ESA, satellite operators) and reporting directly to the company's management

**Your background:**

You have a degree in engineering, physics or a comparable qualification. You have several years of professional experience in space industry, either as a satellite project manager or in leading technical positions. Ideally, you have already worked on DLR or ESA satellite development projects. Excellent communication and negotiation skills in English are mandatory.

You are accustomed to work in teams and make decisions. Furthermore you are a skilled and confident negotiator and possess well-developed communication skills. You attach crucial importance to customer orientation. Besides you have excellent conceptual and analytical skills as well as a good knowledge of process management/analysis.

We offer you an interesting and varied position in a modern high-tech company. Have we aroused your interest? If so, we would be pleased to receive your detailed application by e-mail stating your salary expectations and the code number above.
