

We are a successful and growing systems specialist within the European space technology group OHB Technology AG, where over 1,500 highly qualified specialists develop and produce space technologies in Germany, the rest of Europe and the United States.

For our national and international geostationary satellite programmes, we are currently seeking for immediate commencement a

**Project Technical Responsible Geostationary Satellite Programme (m/f)
(Code Number 462303)**

Your specific duties will be:

- Act as the technical person in charge within a project for development and integration of a geostationary satellite
- Coordinate all technical activities of a geostationary satellite project by leading a group of system and subsystem engineers covering all technical areas of a spacecraft including payload
- Report directly to the project manager

Your background:

You have a degree in engineering, physics or a comparable qualification. You have several years of professional experience in the space industry as technical responsible or in a leading system engineering position. Ideally you have already worked on DLR or ESA satellite development projects.

You are accustomed to work in teams and make decisions. Furthermore you are a skilled and confident negotiator and possess well-developed communication skills. Besides you have excellent conceptual and analytical skills as well as a good knowledge of process management/analysis. Fluency in English language is required.

We offer you an interesting and varied position in a modern high-tech company. Have we aroused your interest? If so, we would be pleased to receive your detailed application by e-mail stating your salary expectations and the code number above.
