

We are a successful and growing systems specialist within the European space technology group OHB Technology AG, where over 1,500 highly qualified specialists develop and produce space technologies in Germany, the rest of Europe and the United States.

For our national and international geostationary satellite programmes, we are currently seeking for immediate commencement a

**System Technical Responsible Geostationary Satellite Programme (m/f)
(Code Number 472303)**

Your specific duties will be:

- Acting as lead system engineer of a project for development and integration of a geostationary satellite
- Coordination of all system level related technical activities of a geostationary satellite project like requirements tracking, design and performance, subsystem and payload interfaces, accommodation and configuration, budgets, verification planning, operations, satellite simulator and satellite database, etc.
- Lead a group of system engineers
- Report directly to the project technical responsible

Your background:

You have a degree in engineering, physics or a comparable qualification. You have several years of professional experience in the space industry as a lead system engineer or in a similar position. Ideally you have already worked on DLR or ESA satellite development projects.

You are accustomed to work in teams and make decisions. Furthermore you are a skilled and confident negotiator and possess well-developed communication skills. Besides you have excellent conceptual and analytical skills as well as a good knowledge of process management/analysis. Very important is also fluency in written and spoken English.

We offer you an interesting and varied position in a modern high-tech company. Have we aroused your interest? If so, we would be pleased to receive your detailed application by e-mail stating your salary expectations and the code number above.
