

We are a successful and growing systems specialist within the European space technology group OHB Technology AG, where over 1,500 highly qualified specialists develop and produce space technologies in Germany, the rest of Europe and the United States.

For our national and international geostationary satellite programmes, we are currently seeking for immediate commencement an

**AOCS Subsystem Engineer Geostationary Satellite Programme (m/f)
(Code Number 562303)**

Your specific duties will be:

- Attitude and Orbit Control System (AOCS) subsystem engineering for a geostationary satellite project
- In charge of the definition and development of the AOCS subsystem including definition of the verification philosophy on subsystem level and specification of test requirements
- Co-ordination with system level via the avionics technical responsible of the project
- Responsibility for the management of subcontractors and hardware suppliers, with support of the subcontractor management organisation within the project
- In charge of all AOCS related project activities, ensuring technical quality as well as schedule and budget compliance on subsystem level
- Leading a group of AOCS project engineers
- Direct reporting to the project avionics technical responsible

Your background:

You have a degree in engineering, space technology, physics or a comparable qualification. You have several years of professional experience in space projects as AOCS subsystem engineer, AOCS project engineer or in a similar technical position. AIT project experience would be of advantage. Ideally, you have already gained experience in DLR or ESA or commercial geostationary satellite projects.

You are accustomed to work in teams. Furthermore you have well-developed communication skills and excellent conceptual and analytical skills. Fluency in the English language is required.

We offer you an interesting and varied position in a modern high-tech company. We would be pleased to receive your detailed application by e-mail stating your salary expectations and the code number above.
