

We are a successful and growing systems specialist within the European space technology group OHB Technology AG, where over 1,500 highly qualified specialists develop and produce space technologies in Germany, the rest of Europe and the United States.

For our national and international geostationary satellite programmes, we are currently seeking for immediate commencement a

**Power Subsystem Engineer Geostationary Satellite Programme (m/f)
(Code Number 622303)**

Your specific duties will be:

- Power subsystem engineering of a project for development and integration of a geostationary satellite
- In charge of the definition and development of the power subsystem including definition of the verification philosophy on subsystem level and specification of test requirements
- Co-ordination with system level via the avionics technical responsible of the project
- Management of subcontractors and hardware suppliers, for which you will be supported by the subcontractor management organisation within the project
- Overall responsibility for all power related project activities, ensuring technical quality as well as schedule and budget compliance on subsystem level
- Leading a group of power project engineers
- Direct reporting to the project avionics technical responsible.

Your background:

You have a degree in electrical engineering, space technology, physics or a comparable qualification. You have several years of professional experience in space industry or in space projects as electrical power subsystem engineer, power project engineer or in similar technical position. AIT project experience would be of advantage. Ideally, you have worked on DLR/ESA or commercial satellite development projects.

You are accustomed to work in teams. Furthermore you have well-developed communication skills and excellent conceptual and analytical skills. Fluency in the English language is required, German would be an asset.

We offer you an interesting and varied position in a modern high-tech company. We would be pleased to receive your detailed application by e-mail stating your salary expectations and the code number above.
