

We are a successful and growing systems provider within the European space technology group OHB Technology AG, where over 1,500 highly qualified employees based in Germany, Europe and the United States develop and produce space technologies.

For our team for the programme navigation, we are currently seeking for immediate commencement a

**Payload System Engineer (m/f)
(Code Number 71612)**

Your specific duties will be:

- Payload System Engineering for satellites
- responsibility for the interfaces between payload and platform
- definition and analysis of the corresponding budgets
- direct contact with sub-contractors and suppliers
- support system integration of satellite and ground station

Your background:

You have a degree in engineering with a major in Aerospace Engineering, Electrical Engineering or comparable qualifications. You have experience with interface engineering (thermal, electrical, TM/TC) as well as with GNSS.

The ability to think on system level is essential. You are used to work in an international environment. Your problem solving skills are strong. Very important are also good communication and negotiation skills. If you have also the ability to operate in a team we would be pleased to receive your detailed application with your salary expectations and the code number above by e-mail.
