

We are a successful and growing systems specialist within the European space technology group OHB Technology AG, where over 1,500 highly qualified specialists develop and produce space technologies in Germany, the rest of Europe and the United States.

We are currently seeking for our national and international satellite programmes for immediate commencement a

**Security System Engineer/Satellite Systems (m/f)
(Code Number 810307)**

Your specific duties will be:

- project work on security systems for space applications:
 - Satellites
 - Ground stations
 - Testing systems
- preparation of the evaluation processes and accreditation of security units
- definition of security concepts and policies
- system design (hardware and software)
- adaptation of communications protocols (CCSDS, SCPS, SLE)
- development of threat and risk analyses and definition of countermeasures
- participate in security system studies
- help prepare business proposals

Your background:

You have a degree in electrical engineering and ideally professional experience in security engineering and good experience in software and hardware engineering. An affinity with space systems would be desirable.

Moreover, you are able to work independently and with a great deal of flexibility. If you also enjoy organizing, working in a team and have a good knowledge of written and spoken English, we would be pleased to receive your full application by e-mail quoting your salary expectations and the code number above.
