

We are a successful and growing systems provider within the European space technology group OHB Technology AG, where over 1,500 highly qualified employees based in Germany, Europe and the United States develop and produce space technologies.

For our team for the programme navigation, we are currently seeking for immediate commencement a

**Payload Operations Engineer (m/f)
(Code Number 81612)**

Your specific duties will be:

- System support of the on-board payload for the satellite
- definition of the software interfaces between payload and platform
- close cooperation with sub-contractor and suppliers
- support system integration of satellite and ground station

Your background:

You have a degree in engineering with a major in Aerospace Engineering, Electrical Engineering or comparable qualifications. Furthermore you should have experience with GNSS. You have experience in satellite and payload operations as well as with software interface engineering.

The ability to think on systems level is essential. You are used to work in an international environment. Your problem solving skills are strong. Very important are also good communication and negotiation skills. If you have also the ability to operate in a team, we would be pleased to receive your detailed application with your salary expectations and the code number above by e-mail.
