

We are a successful and growing system provider within the European space technology group OHB Technology AG, where over 1,500 highly qualified employees based in Germany, Europe and the US develop and produce space technologies.

For our national and international satellite programmes we are currently seeking for immediate commencement a

**System Engineer Satellite Integration (m/f)  
(Code Number 871211)**

**Scope of Duties:**

- Planning and controlling integration schemes within extensive satellite programmes
- Setting up integration processes and requirements for test plans, test procedures and test software
- Evaluation of time schedules and quantity valuation
- Organization of overall-system test procedures
- Co-ordination of integration processes with customers, subcontractors and test houses
- Evaluation of test and validation reports

**Your qualifications:**

You have a superior degree in Natural Sciences or Engineering. You ideally have professional experience in ESA or commercial satellite projects as a system engineer for years, experience in hardware projects in the phases B/C/D as well as in requirements-management especially with DOORS will be an advantage. Additionally, we expect you to be confident in dealing with customers, suppliers and subcontractors.

If you, beyond the above, have very good written and spoken English skills and enjoy working in a team within a big project, please send us via e-mail only, your CV and references stating your salary expectations and reference number.
