

We are a successful and growing systems provider within the European space technology group OHB Technology AG, where over 1,500 highly qualified employees based in Germany, Europe and the United States develop and produce space technologies.

For our electronics systems division for the programme navigation, we are currently seeking for immediate commencement a

**System Engineer Satellite EMC/ESD (m/f)
(Code Number 981512)**

Your specific duties will be to:

- produce EMC specifications for satellite technology
- perform analyses and simulations
- prepare EMC testing procedures and test reports
- plan and execute EMC tests at the unit and system level

Your background:

You have a degree in engineering with a major in electrical engineering or (communications technology/high-frequency technology) comparable qualifications. Ideally, you have several years of professional experience as an EMC/ESD engineer in space technology. You should be highly familiar with EMC/ESD analysis and simulation tools. Experience with Phase B/C/D hardware projects, preferably in the area of satellite systems, would also be desirable.

You are communicative and enjoy working in a team on a large project. Your strengths include the ability to swiftly work your way into new duties, flexibility, an independent and effective approach to your work as well as responsibility. As well as this, you have good skills in written and spoken English and are conversant with the standard Microsoft Office tools.

We offer you an interesting and varied position in a modern high-tech company. Have we aroused your interest? If so, we would be pleased to receive your detailed application stating your salary expectations and the code number above by e-mail.
